PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience designing and building enterprise-grade web applications using React.js, Node.js, and Oracle Database for large-scale manufacturing operations serving 40,000+ users. Skilled in component-driven UI development, **state management**, REST API integration, SQL and NoSQL database design, and Role-Based Access Control (RBAC) security. Experienced in Agile team environments, end-to-end deployment, and production issue resolution. Proven track record of improving process efficiency and reducing operational errors through scalable, secure full stack solutions.

TECHNICAL SKILLS

Frontend	React.js, Redux , Context API (State Management) , JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design
Backend	Node.js, REST API Design & Integration, MVC Architecture
Databases	Oracle Database, MongoDB, SQL, Schema Design
Security	Role-Based Access Control (RBAC), SHA-256 Encryption, Secure Authentication Workflows
Tools & Control	Git, GitHub, SVN, Postman, IIS Server, VS Code

PROFESSIONAL EXPERIENCE

Full Stack Developer | Foxconn Hon Hai Technology - Sriperumbudur, TN Dec 2021 – Dec 2025

- Collaborated with a 3-member engineering team in an Agile environment to build and maintain enterprise applications supporting operations, security, and compliance management for 40,000+ employees.
- Strengthened application security by designing a two-layer SHA-256 encryption architecture with key-based decryption for sensitive enterprise data modules.
- Managed end-to-end deployments via IIS Server and SVN version control, performed API testing with Postman, and resolved production issues through rapid patch releases.

KEY PROJECTS

- Dormitory Management System:** Engineered using React.js, Node.js, **Redux (State Management)**, and Oracle Database to automate accommodation workflows, achieving zero critical security incidents and zero major downtime since launch.
- License Management System:** Architected a centralized system with automated renewal alerts and role-based access control (RBAC), cutting manual operational errors by 80% and improving compliance tracking.
- Security & Visitor Management System:** Developed visitor entry, vehicle tracking, and automated gate pass modules with React.js, reducing average visitor processing time by 40%.
- POSH Compliance Platform:** Implemented a responsive compliance platform using React and NodeJS with advanced RBAC workflows to secure sensitive case management and reporting data.
- Facility Management System (FMS) Dashboards:** Built and deployed real-time operational dashboards for Transport, Canteen, Grievance, and Repair workflows, enabling centralized monitoring across departments.

CERTIFICATIONS & COURSES

- **Full Stack Development with AI Tools** – GUVI (Completed May 2026)

EDUCATION

Diploma in Electrical and Electronics Engineering

June 2018

Adiparasakthi Polytechnic College, Melmaruvathur, Tamil Nadu | Overall Score: 79%

INTERESTS

Traveling, Gaming, 3D Printing (Kitforge), DIY Hardware Projects.
