

DINESH BABU K

Full Stack Developer | React.js · Node.js · Oracle DB

+91 99402 17745 | Dineshkaru28@gmail.com | dineshbabu-dev | dineshbabudev.netlify.app | Chennai, India

PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience designing and building enterprise-grade web applications using React.js, Node.js, and Oracle Database for large-scale manufacturing operations serving 40,000+ users. Skilled in component-driven UI development, REST API integration, SQL and NoSQL database design, and Role-Based Access Control (RBAC) security. Experienced in Agile team environments, end-to-end deployment, and production issue resolution. Proven track record of improving process efficiency and reducing operational errors through scalable, secure full stack solutions.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design
Backend	Node.js, REST API Design & Integration, MVC Architecture
Databases	Oracle Database, MongoDB, SQL, Schema Design
Security	Role-Based Access Control (RBAC), SHA-256 Encryption, Secure Authentication Workflows
Tools & Version Control	Git, GitHub, SVN, Postman, IIS Server, VS Code

PROFESSIONAL EXPERIENCE

Full Stack Developer

Dec 2021 – Dec 2025

Foxconn Hon Hai Technology — Sriperumbudur, Tamil Nadu

- Collaborated with a 3-member engineering team in an Agile environment to build and maintain enterprise applications supporting operations, security, and compliance management for 40,000+ employees.
- Engineered a Dormitory Management System using **React.js, Node.js, and Oracle Database** to automate accommodation workflows, achieving zero critical security incidents and zero major downtime since launch.
- Developed visitor entry, vehicle tracking, and automated gate pass modules with **React.js**, reducing average visitor processing time by 40%.
- Architected a centralized License Management System with automated renewal alerts and **role-based access control (RBAC)**, cutting manual operational errors by 80% and improving compliance tracking.
- Built and deployed real-time operational dashboards for Transport, Canteen, Grievance, and Repair workflows, enabling centralized monitoring across departments.
- Implemented a responsive POSH compliance platform using **React and NodeJS** with advanced RBAC workflows to secure sensitive case management and reporting data.
- Strengthened application security by designing a two-layer SHA-256 encryption architecture with key-based decryption for sensitive enterprise data modules.
- Managed end-to-end deployments via IIS Server and SVN version control, performed API testing with Postman, and resolved production issues through rapid patch releases.

EDUCATION

Diploma in Electrical and Electronics Engineering

June 2018

Adiparasakthi Polytechnic College, Melmaruvathur, Tamil Nadu — Overall Score: 79%

ADDITIONAL TRAINING & INTERESTS

Courses	Python Programming, Full Stack Development with AI Tools
Interests	Traveling, Gaming, 3D Printing, DIY Hardware Projects
