SUMMARY

Full Stack Developer with over 4 years of experience in creating enterprise-level web applications using React.js, Angular, Java, Node.js, and Oracle DB. Skilled in designing secure systems and front-end development with MVVM architecture. Proficient in deploying applications on IIS, managing source control with SVN, and supporting large-scale user systems.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Foxconn Hon Hai Technology, Sriperumbudur, TN

December 2021 – December 2025

A global electronics manufacturing services company

Worked as part of a **3-member development team** responsible for designing, developing, and deploying multiple enterprise web applications across various business functions.

- Designed and launched a secure **Dormitory Management System** with end-to-end encryption, ensuring the protection of sensitive employee data, resulting in **zero data breaches** during the first year.
- Built and deployed a centralized **License Management System** to oversee company-wide licenses, streamline user access, track activations, and trigger automated renewal alerts.
- Developed a **POSH Compliance Platform** for both web and mobile, featuring intuitive reporting tools, case tracking, and secure, role-based access control.
- Implemented a robust **two-layer encryption system** using SHA-256 and key-based decryption to strengthen overall application security.
- Created a **Security Management System** to track visitor entries, manage vehicle access, and issue gate passes efficiently.
- Led the development of a comprehensive **Facility Management System (FMS)**, which included modules for:
 - Transport:** Managing employee shuttle schedules and route assignments
 - Canteen:** Handling meal scheduling, vendor coordination, and menu tracking
 - Grievance:** Enabling employees to raise, escalate, and resolve workplace concerns
 - Repair:** Streamlining maintenance requests and technician dispatching
- Delivered **real-time dashboards** and admin notifications to enhance operational oversight and responsiveness.
- Worked closely with end users to **identify and resolve issues**, performing in-depth root cause analysis and rolling out patches and feature updates to improve system performance.
- Deployed applications on **IIS Server** and managed source control using **SVN**, ensuring stability and traceability across releases.
- Applied the **MVVM architecture pattern** to structure scalable and maintainable front-end codebases, particularly in Angular and Vue.js projects.

EDUCATION

Adiparasakthi Polytechnic College,
Melmaruvathur, TN | June 2018

Diploma in Electrical and Electronics Engineering,

Overall Percentage: 79%

PROJECTS

POSH Compliance Platform

Angular (Web), Vue.js (Mobile),
Node.js

Security Management System

Angular, Node.js, Vue.js

Facility Management System (FMS)

Angular, Node.js
(Transport, Canteen, Grievance)

Dormitory Management System

React.js, Node.js, Oracle DB, IIS

License Management System

React.js, Node.js, Oracle DB

RELEVANT SKILLS

React JS
Angular
JavaScript
Typescript
Material UI
NG-Zorro
Ant Design
HTML, CSS
Vue Js
Node Js
JAVA
Oracle
SVN
IIS

COURSES

Java Android
Flutter
Python

INTERESTS

Traveling, Gaming, 3D Printing, DIY
Hardware Projects
